VOLUME 34, NUMBER 1 1979

CONTENTS

Hong H. Lee	1	Use of a continuously-fed batch reactor for gas-phase mixture with many first-order reactions
Hong H. Lee	5	Effectiveness factors for solid-catalyzed gas-solid reactions
Manfred Morari, George Stephanopoulos and Rutherford Aris	11	Stability analysis of structured chemical engineering systems via decomposition
N. I. Heywood and J. F. Richardson	17	Slug flow of air–water mixtures in a horizontal pipe: determination of liquid holdup by γ-ray absorption
Nils Lindman and Daniel Simonsson	31	On the application of the shrinking core model to liquid–solid reactions
Larry D. Gaines	37	Ammonia synthesis loop variables investigated by steady-state simulation
Oliver T. Chen and Robert G. Rinker	51	Modification of the dusty–gas equation to predict mass transfer in general porous media
Guillermo F. Barreto and Italo H. Farina	63	An efficient univariate method to solve systems of non-linear equations
